IG Hand Cart

The proLogistik Group IG hand cart serves as a mobile workstation, e.g., for incoming goods or for quality inspection in the warehouse. A mobile on-board computer (e.g., the proLogistik pro-V-pads), a scanner holder, a label printer, and a battery box can be mounted on the hand cart, the hand cart, rendering it independent of the mains and permitting flexible use in the warehouse.

The IG hand cart has many practical functions. Its four casters ensure the greatest agility and mobility. The deposit surfaces with integrated storage space create enough space for the employee's work documents. With a carrying strength of 100 kg, it is also very robust and resilient. The integrated cable duct protects the cable routing.

TECHNICAL DATA

The proLogistik Group IG hand cart can be customised and varied in equipment and set-up. It can be adjusted to requirements. We also offer the matching hardware such as on-board computers, printers, scanners with holder, and battery boxes.

DIMENSIONS 1,120 x 550 x 580 mm (H x W x D)

CARRYING CAPACITY 100 kg,
dead weight (without hardware): 39 kg

MISCELLANEOUS Integrated cable duct.
Four casters.
Parking brake at the front casters.
Special deposit for battery and printer.

Customisation possible upon request.
