proLogistik Group Collective Supply Chain Excellence

As the market leader for ERP-independent warehouse management systems in the DACH region, we are aware of our customers' challenges: Volatile markets, sustained cost pressure, fluctuating demand, increasingly small purchase order sizes, and the demand for shorter delivery times in connection with highest delivery quality and returns management. We support small and large companies if they wish to replace their existing systems or introduce their first WMS with precisely fitting software solutions.

System solutions for your supply chain

We bundle the competences of more than 500 employees in warehouse, transportation, hardware, and consulting. Many happy customers from wholesale and retail, industry, e commerce, and the 3PL service sector can already profit from our supply chain solutions optimised across all steps.

proLogistik Group WMS

Maximum efficiency across all process chains

Automation and digitalisation

Everything in view and everything under control – our warehouse management system proLogistik Group WMS (pLG WMS) digitally maps the entire logistics process from incoming goods, picking, and final inspection. The warehouse management software provides users with transparent data in real time. This ensures greatest flexibility and permits timely reaction even in cases of spontaneous bottlenecks.

The pLG WMS can be seamlessly integrated into a company's processes and systems and used throughout the entire value chain. This close connection of material and information flow improves quality of the work output while reducing the amount of work.

This is possible, among other things, because the pLG WMS guides employees through the work processes with clearly comprehensible dialogues. All information are requested or provided precisely when the employee requires it this way, improving long-term process reliability.

proLogistik Group WMS also delivers and visualises a plethora of common and individual logistics key performance indicators (KPIs) that support companies in controlling and optimising their operational business processes.

Our warehouse management system can be easily connected to any common merchandise management systems on the market as well as to third-party systems via interfaces.

A system with many advantages

Service quality and speed

Costs can be sustainably reduced, sources of error eliminated, and growth effectively managed with smart intralogistics processes. proLogistik Group provides its partners with demand-oriented software and hardware to ensure greatest efficiency across all process chains.

Avoiding equipment errors

Inventory safety

Delivery quality

Efficiency

Picking without any faults

Traceability

„The new Logistics Campus in Eschweiler and fully digitised processes now enable us to optimally implement our clients' multi-channel concepts on an operative level. This also means that we can calmly face peaks such as Black Friday or the Cyberweeks.“

“Growing and changing demands can be implemented flexibly at all times thanks to the Warehouse Management System by proLogistik with a function scope that fully covers 3PL specifics.“

Tim Wilhelm, Managing Director, Hammer

Awards & Certifications

We have our pLG WMS comprehensively tested and subsequently validated by the Fraunhofer Institute for Material Flow and Logistics (IML) every year as constant quality control. This allows us to certify ourselves as a provider in the IML's Online Warehouse Logistics Portal every year. Our warehouse management software has also been awarded the RedDot Award and the if DESIGN AWARD for its outstanding, ergonomic and user-friendly design.

Core functions

Additional functions

- Batches
- Cross docking
- Dock & yard management
- Double / multi-depth storage
- Hazardous goods
- Hazardous materials
- Weight control
- Handling-units measurement Kit formation
- Dispatch
- Empties and load handling equipment
- (Multi) client capacity
- Multi-warehouse capacity
- Best-before-date
- Package optimisation
- Production supply / disposal
- Resource planning / labour management
- Returns
- Serial numbers
- Slotting & warehouse reorganisation
- Stacker control system
- Value added services
- Vendor managed inventory
- Scrapping
- Customs

Your must-have for 3PL

pLG WMS optimises your processes

Client-capacity

- Different process control on the client
- Access per client to the current stock

Fulfilment / E-Commerce

Webshop connection for direct Placement of B2C customer orders, Multi-order picking, Returns management

Kitting / set formation or VAS

Composition of individual components into a new part number and management of the entire process in WMS

Interfaces

- Converter / Lobster
- WEB-service
- Forwarding programmes / transport management systems

Billing services

Detailed documentation of the services rendered in the warehouse for settlement

Special features

- Multi-warehouse capacity
- Block warehouse management
- Warehouse fee manager
- Flexible design of client-related print layouts
- Connection to shipping service provider
- Yard management
- Value-added services
- Stacker control system
- NVE-collection
